

Shortest Path in Unweighted Graph

Source
 $s = 0$

Shortest ?

→ what is the shortest path to delhi ?

Now source \rightarrow 0

\Rightarrow

Print the shortest distance to
every other vertex from source vertex

Ans

	0	1	2	3
	0	1	2	1

G =

Now, Solution

we are going to use BFS

Recos,

It first traverse vertex

1 edge away

2 edge away

3 edge away

then

then

G =

G =

BFS

$L[u] = v$

$dist(u) + 1$ rounded

- ① Initialise $dist[v] = [\infty, \infty, \infty, \infty]$
- ② $dist[s] = 0$
- ③ Initialise, $visited[v] = [F, F, F, F]$
- ④ create, queue, q ;
- ⑤ $q.push(s)$; $visited[s] = T$
- ⑥ while ($!q.empty()$)
 - < int u = $q.pop()$
 - for (every adjacent v of u)
 - < if ($!visited[v]$)
 - < $dist[v] = dist[u] + 1$;
 - $visited[v] = T$; $q.push(v)$;
 - >>
- ⑦ Print $dist[]$;

visited

0	1	2	3
F	F	T	T

dist[] =

0	1	2	3
0	1	2	1

$q =$ ~~0~~ ~~1~~ ~~3~~ ~~2~~

$u =$ ~~0~~ ~~1~~ ~~3~~ ~~2~~

$h =$

dist

0 1 2 1

- ① Initialise dist[v] = [∞, ∞, ∞, ∞]
